TOTAL EQUITY	**732,020,238**	**782,324,928**

EXPLANATION OF MATERIAL VARIANCES

The material variance thresholds are adopted annually by Council to identify significant differences between the year-to-date budget and actual revenue and expenditure.

In accordance with Regulation 34(3)(5) of the *Local Government (Financial Management) Regulations 1996*, Council has adopted a material variance threshold for the 2026/27 financial year of **±10%**, where the variance is also **greater than $50,000**, for both revenue and expenditure.

Revenue from operating activities

Nature	Variance $	Variance %	Explanation of Material Variance
Interest Revenue	141,123	15%	Interest revenue is high due to higher-than-expected instalment interest received than budgeted.
Other Revenue	294,434	169%	Other revenue is more than budgeted due to Catalina Regional Council refunds, court charges reimbursed for parking and recouped expenses for property and leases.
Profit on asset disposal	(1,474,650)	-100%	Profit on asset disposal is under budget due to proceeds from the sale of land at McMaster Street and is a timing variance as budgeted.

Expenditure from operating activities

Nature	Variance $	Variance %	Explanation of Material Variance
Materials and contracts	(2,101,715)	-30%	Materials and Contracts are under budget primarily due to the timing of expenditure and delivery of maintenance and operational works across several service areas, including design, waste services, Engineering, people and culture, assets, parks and reserves and place planning. The variance also reflects lower bank fees allocations and lower legal cost in financial services. The variance is expected to normalise over the financial year.
Other Expenditure	88,677	11%	Other expenditure is over budget due to increased infringement issuance, therefore higher additional costs relating to lodgement of unpaid infringements with Fines Enforcement Registry and sponsorship expenditure in Facilities not budgeted.

Inflows from investing activities

Nature	Variance $	Variance %	Explanation of Material Variance
Capital grants, subsidies and contributions	(4,775,414)	100%	Capital grants, subsidies and contributions are under budget due to timing of grant revenue recognition . Grant funding is expected to be recognised as the relevant grant conditions are met and expenditure is incurred.

Outflows from investing activities

Nature	Variance $	Variance %	Explanation of Material Variance
Payments for Property, plant and equipment	(892,936)	-61%	Payments for Construction of Property, Plant and Equipment are under budget primarily due to timing issue of receiving invoices from the contractors and projects not started and is a timing variance which will normalise in the financial year. Details are in the Note 6 Capital Acquisitions.
Purchase and construction of infrastructure	(11,666,468)	-92%	Payments for Construction of Infrastructure are under budget primarily due to timing issue of receiving invoices from the contractors, projects timing issue and few of the projects are in design and procurement phase. Details are in the Note 6 Capital Acquisitions.

Inflows from financing activities

Nature	Variance $	Variance %	Explanation of Material Variance
Transfer from reserves	(1,835,031)	89%	Transfer from Reserves is under budget due to timing issue of processing reserve transfers as budgeted. Details are in the Note 5 Reserve.

Outflows from financing activities

Transfer to reserves	127,116	6%	Transfer to Reserves is over budget primarily due to timing issue of processing reserve transfers as budgeted. Details are in the Note 5 Reserve.

BASIS OF PREPARATION

This prescribed financial report has been prepared in accordance with the Local Government Act 1995 and accompanying regulations.

LOCAL GOVERNMENT ACT 1995 REQUIREMENTS

Section 6.4(2) of the Local Government Act 1995 read with the Local Government (Financial Management) Regulations 1996, prescribe that the financial report be prepared in accordance with the Local Government Act 1995 and, to the extent that they are not inconsistent with the Act, the Australian Accounting Standards. The Australian Accounting Standards (as they apply to local governments and not-for-profit entities) and Interpretations of the Australian Accounting Standards Board were applied where no inconsistencies exist.

The Local Government (Financial Management) Regulations 1996 specify that vested land is a right-of-use asset to be measured at cost and is considered a zero-cost concessionary lease. All right-of-use assets under zero cost concessionary leases are measured at zero cost rather than at fair value, except for vested improvements on concessionary land leases such as roads, buildings or other infrastructure which continue to be reported at fair value, as opposed to the vested land which is measured at zero cost. The measurement of vested improvements at fair value is a departure from AASB 16 which would have required the Town to measure any vested improvements at zero cost.

Local Government (Financial Management) Regulations 1996, regulation 34 prescribes contents of the financial report. Supporting information does not form part of the financial report. Accounting policies which have been adopted in the preparation of this financial report have been consistently applied unless stated otherwise. Except for cash flow and rate setting information, the financial report has been prepared on the accrual basis and is based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets, and liabilities.

THE LOCAL GOVERNMENT REPORTING ENTITY

All funds through which the Town controls resources to carry on its functions have been included in the financial statements forming part of this financial report.

The Town does not hold any monies in the Trust Fund.

BASIS OF PREPARATION (CONTINUED)

JUDGEMENTS AND ESTIMATES

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgements, estimates and assumptions that effect the application of policies and reported amounts of assets and liabilities, income and expenses.

The estimates and associated assumptions are based on historical experience and various other factors believed to be reasonable under the circumstances; the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The balances, transactions and disclosures impacted by accounting estimates are as follows:

- estimated fair value of certain financial assets
- impairment of financial assets
- estimation of fair values of land and buildings, infrastructure, and investment property
- estimation uncertainties made in relation to lease accounting
- estimated useful life of intangible assets

SIGNIFICANT ACCOUNTING POLICES

Significant accounting policies utilised in the preparation of these statements are as described within the 2026/27 Annual Budget. Please refer to the adopted budget document for details of these policies.

PREPARATION TIMING AND REVIEW

Date prepared: All known transactions up to 30 September 2026.

6. CAPITAL ACQUISITIONS

SIGNIFICANT ACCOUNTING POLICIES

Each class of fixed assets within either property, plant and equipment or infrastructure, is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Assets for which the fair value as at the date of acquisition is under $5,000 are not recognised as an asset in accordance with Financial Management Regulation 17A (5). These assets are expensed immediately.

Where multiple individual low value assets are purchased together as part of a larger asset or collectively forming a larger asset exceeding the threshold, the individual assets are recognised as one asset and capitalised.

Initial recognition and measurement for assets held at cost.

Property, Plant and equipment including furniture and equipment is recognised at cost on acquisition in accordance with Financial Management Regulation 17A. Where acquired at no cost the asset is initially recognise at fair value. Assets held at cost are depreciated and assessed for impairment annually.

Initial recognition and measurement between mandatory revaluation dates for assets held at fair value.

In relation to this initial measurement, cost is determined as the fair value of the assets given as consideration plus costs incidental to the acquisition. For assets acquired at zero cost or otherwise significantly less than fair value, cost is determined as fair value at the date of acquisition. The cost of non-current assets constructed by the Town includes the cost of all materials used in construction, direct labour on the project and an appropriate proportion of variable and fixed overheads.

Capital Acquisitions
