To the Mayor of the Town of Victoria Park,

We, the undersigned, all being electors of the Town of Victoria Park do respectfully request that Council:

Refuse the application for the redevelopment of the concrete batching plant at no.12 (LOT 310) Cohn Street, Carlisle 5.2020.708.1 on the following grounds:

- Previous expansion in 2015 from 80,000m³ to 115,000m³ was approved as temporary (24 months) yet continued for a further 4 years and is now proposed to almost double to 200,000m³.
- The incremental expansion and intensification of an 'X' land use, of the above magnitude, exploits beyond what is reasonable, the non-conforming use rights that are legally afforded to the use.
- The preservation of the amenity of the locality can no longer be assured with confidence given the lack of compliance with the 2015 approval.
- The preservation of the amenity of the locality can no longer be assured with confidence. The future demand for concrete in major CBD projects is unknown and can be reasonably expected to exceed the current proposed output in the future because the supply of concrete contracted by Holcim will come solely from Carlisle due to the closure of East Perth.
- The proposed expansion and intensification of the use will negatively impact the future growth of Oats Street Station precinct identified in the Town's Draft Local Planning Strategy.
- The proposed expansion and intensification of a noxious industry directly adjacent to a medium density area and within a walkable catchment of a train station and future TOD is not within the realm of orderly and proper planning.

Correspondence should be addressed to:

Heather Johnstone
11 Cohn Street
Carlisle, 6101

The names and addresses of the petitioners are as follows:

Refuse the application for the redevelopment of the concrete batching plant at no.12 (LOT 310) Cohn Street, Carlisle- 5.2020.708.1 on the following grounds:

- Previous expansion in 2015 from 80,000m³ to 115,000m³ was approved as temporary (24 months) yet continued for a further 4 years and is now proposed to almost double to 200,000m³.
- The incremental expansion and intensification of an 'X' land use, of the above magnitude, exploits beyond what is reasonable, the non-conforming use rights that are legally afforded to the use.
- The preservation of the amenity of the locality can no longer be assured with confidence given the lack of compliance with the 2015 approval.
- The preservation of the amenity of the locality can no longer be assured with confidence. The future demand for concrete in major CBD projects is unknown and can be reasonably expected to exceed the current proposed output in the future because the supply of concrete contracted by Holcim will come solely from Carlisle due to the closure of East Perth.
- The proposed expansion and intensification of the use will negatively impact the future growth of Oats Street Station precinct identified in the Town's Draft Local Planning Strategy.
- The proposed expansion and intensification of a noxious industry directly adjacent to a medium density area and within a walkable catchment of a train station and future TOD is not within the realm of orderly and proper planning.
